ABSTRACT - Noval corona virus that causes the disease COVID 19 ,now a days called Pandemic disease. COVID 19 is the infectious disease.This new virus spreadedfirst in Wuhan City belonging to China country. Today this disease captures all over world near about 180 country. Whole world is in the state of fearness. This disease may affect human physical condition also the socio-economical and educationalsystem.Every person is affected by directly or indirectly today. In india,this Pandemic disease COVID 19 is also affecting indian people daily life, social life ,education system,mental health and also economy. But disease COVID 19 is working as the worship also in accordance with the online education. Though all primary schools, high schools, secondary colleges and university every educational institute were completely closed due to LOCKDOWN , at the same time allover India, other side the solution in education is found that is ONLINE LEARNING. At the important time of students and teachers the government had taken the LOCKDOWN decision by not heart.It definitely effect on study ,exam and the progress of student but it of not any mistake.At the same time on the other side the education system launches the forcefully activities for the progress and on great demand of educational policy i.e. ONLINE LEARNING. During this pandemic diseases many technocrats teachers made the educational apps, tests, whats app study group, you tube videos, many online materials , online activities for COVID 19 its causes, prevention measures,effects ,awareness, survey ,online self test for COVID 19 along with the study. It plays the vital role in students daily study ,learning- teaching method ,every subject ,society- parents-teacher interaction and inter connection,to bind all students and parents to education system and not to throw out of this education area.It is found that education department makes some useful apps.It is also found that maximum schools are participated in this online learning program . It enggeged the pupils, parents and teachers. It is found that online learning is useful in awareness of government actions, policies and collaboration against COVID 19.

KEY WORDS -COVID 19 , online learning, education, apps

INTRODUCTION- Noval corona virus that causes the disease COVID 19.The word COVID 19 means CO for Corona VI for Virus, D for Diseases AND 19 FOR YEAR 2019. Novalcorona virus has crown spherical shape so it named corona. COVID 19 is the infectious disease. It spreads from man to man by shaking hands ,kissing, sneezing . This new virus spreadedfirst in Wuhan City belonging to China country. Today this disease captures all over world near about 180 country. Whole world is in the state of fearness . W.H.O. decleared it as a pandemic diseases.Now a days COVID 19 is called Pandemic disease. In India it also spreads all over country ,every state and specially in Maharashtra.Yet today there is no vaccination or anti dose against this disease. The breaking of chain is the better option for COVID 19, so From 24 March all over India is LOCKEDDOWN . Due to this Maharashtra is also LOCKEDDOWN so everything is LOCKEDDOWN. Every person is affected directly or indirectly today. In india ,this Pandemic disease COVID 19 is also affecting indian people daily life, social life ,education system, mental health and also economy. But disease COVID 19 is working as the worship also in accordance with the online education. Though all primary schools, high schools, secondary colleges and university every educational institute were completely closed due to LOCKDOWN , at the same time all over India, other side the solution in education is found that is ONLINE LEARNING.

OBJECTIVES OF THE STUDY- The main objectives of the study are as follows-

        1)To study the process of online learning during COVID 19.

2) To study theeffect of COVID 19 on online learning.

METHODOLOGY OF THE STUDY - In this study the data has been collected from google sources, educational whats app group, educational channels, government sources and online publications.

DISCUSSION- ONLINE LEARNING – It is education that takes place over the internet.It is often referred to as 'e-learning'. Online learning is just one type of the 'distance learning'.the umbrella term for any learning that takes place across distance not in traditional classroom.

COVID 19 AND ONLINE LEARNING - As total Maharashtra is LOCKED DOWN and everything is closed It affects that primary and middle schools, junior and senior colleges, university and offices even secretariat offices are closed means every thing is closed. It results on the education of students.Actually it is the time of the study and exam. It may resulted into that examination are cancelled for std.1 to 8 and even also the std. 10th Geography paper is also cancelled. University has not yet organized the exam.no any decision for exam date schedule. This disease affects educational system, human physical condition and socio-economical condition. But at the same time all over India, other side the solution for education is found that is ONLINE LEARNING.

HOW ONLINE LEARNING PROCESS WORKING DURING COVID 19 –

1) Government has developed the various educational and awareness apps for programme for the COVID 19 its symptoms and preventions along with the study

2) Government has delivered the various educational programme on the T.V. for the students to study.

3) Government has given the links of many Online publications,e-books for helping the study.

4) The government has organized many online conferences and seminars for the students and parents for awareness about COVID 19 its symptoms and preventions along with the study.

5) Many Schools are engaged the students byadvising many educational apps like kahoot.

6) Many Schools are engaged the students by uploading many educational videos on you tube channels etc for studytopics.

7) Many schools are formed the whats app group for studying. Online interaction, instructions and study materials are provided. The teachers had given the task to complete and students tried to complete in particular time. The difficulties are solved by the teachers.

8) Many Schools are continued communication by delivering the virtual live classes like Zoom, Google classroom.

9) Many Schools are sent the link for online paper and study.

10) Technocrats teachers are making many tools to interact the students for helping in their study.

11) Self test and evaluation paper are sent by school, teachers to attach link with the study.

CONCLUSIONS - From above study -

1)It is found that the need of online learning is increased during COVID 19.

2) It is found that the number of educational apps ,videosare increased during COVID 19.

3)It is found that education is affected but not stops during COVID 19.

4) It is found that it plays the vital role in students study, learning- teaching method , every subject , society- parents-teacher interaction and inter connection.

5)It is found that online learning is more effective in urban areas than rural due to poor connectivity.
